WEBAXY

The Instant Web Site Application Suite

Webaxy is a unique, painless, Internet/Intranet web site application suite, which includes intuitive browser-based content management as well as communication, collaboration and productivity tools.
Webaxy is a proven system that has been used successfully on-line since 1998.

Webaxy is fully scalable and flexible,and is available in 3 versions:

- Webaxy Business for Small to Large Businesses
- Webaxy Intranet for Company Intranet
- Webaxy Community for Small to Large Organizations, Schools, Colleges and Communities

System Features:

Powerful Web Tools:

Webaxy includes built-in tools that are needed by interactive websites, including:

- Document Management, including password protected directories.
- Search Engines
- Web Page Authoring
- Online Discussions
- Contact and Mailing Lists
- Tasks and Events Management
- Site News Updates
- Polls

Intuitive and Simple:

All that is needed to manage and use Webaxy is a popular web browser. No special technical knowledge is necessary since all management tasks are done using intuitive forms and controls. Webaxy installs instantly with a click of the mouse.

Full Control:
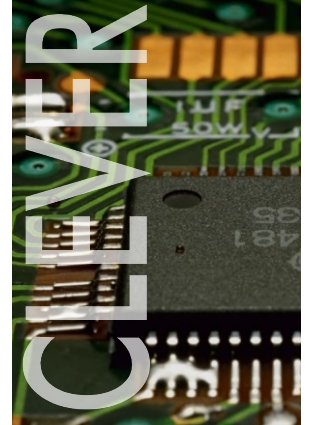

Managers have full control over the whole system:

- Content Management
- Access Control and User Permissions
- Appearance

Flexible Design:

Webaxy comes with an out-of-the-box website design, which is easily customized with a few mouse clicks. Logos, bullets and background colors can be changed to meet specific design needs. Custom designs can also easily be integrated into Webaxy.

Cost Effective:

Webaxy is an off-the-shelf web site application suite resulting in tremendous savings in development costs, debugging and time.

Applications

Dynamic Menu

The Dynamic Menu enables easy access to all of the site areas. The menu can easily be modified and rearranged to suite any site's specific needs and structure.

MagicPage

MagicPage is an advanced online web-page authoring and document management system. Web pages can be on the web within minutes using readily made templates. File and directory management features include file upload, renaming, deleting and moving of files.

Search Engine

With the Search Engine, all site information is retrievable quickly and efficiently using simple keyword queries.

Forums

The Forums system is an advanced online discussion system that allows carrying out an unlimited number of discussions. Some of its many features include open and closed discussions, linear/hierarchical discussions, email updates of discussion activity and image and document attachments.

Contacts

Organizes all important addresses, phone numbers, fax numbers, emails, cell phone numbers and website addresses in one accessible place. Contacts are easy to find browsing the categories and sub-categories or by simply using the integrated search tool.
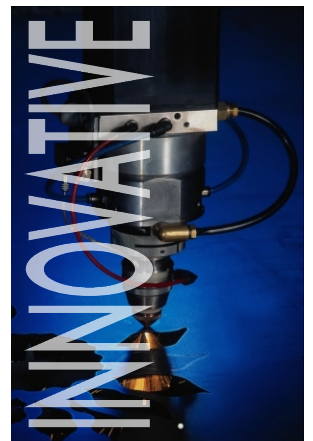

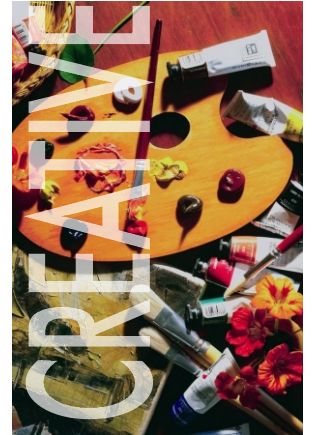

Bulletin Board

This simple yet efficient notice board system allows posting and managing of notices within separate boards. Notices can up within minutes. Any notice can have an expiry date after which it will automatically disappear.

Site Index

Serves as a private website directory. It organizes sites in a hierarchical structure and allows unlimited number of entries, retrievable by browsing the directory tree or searching with the site search engine. Each entry has a title, description, and direct link to the site.

InfoBase

InfoBase is a document and file sharing and management system that allows uploading of any type file to the web site. It organizes data by topics and sub topics allowing an easy way to find any document. All file types can be retrieved using the site search engine.

WEBAXY

Events Board   Birthdays, holidays, trips, conferences, and other events can all be placed on the Events Board. Events are separated into categories and can be viewed by time or topic.

What's New   Automatically displays updates on the website. The system lists all new documents and items from the last day, week, month or other selected period.

Personal Updates   Automatically sends subscribers email updates with information about new documents that have been published on the site. The email links directly back to the new documents. Users can subscribe to specific update topics, and receive only the information they are interested in.

Guest Book   Allows visitors to write comments and remarks posted directly to the site. Unwanted comments can easily be deleted.

Mailing Lists   Advanced web based mailing list system. An unlimited number of mailing lists can be defined with unlimited recipients. Each list has its own set of permissions and restrictions, allowing only authorized persons to use specified lists.

Calendar   With the Calendar, you can schedule personal and group meetings, compare calendars within your group members, view group-wide events, set reoccurring events and receive email notifications of upcoming events.

Polls   Easily builds, manages and runs online polls. For each poll the voters can be grouped by specific characteristics such as age, country, department etc. Polls automatically close when they reach a set expiration date. The system keeps an archive of all previous polls that can be viewed at any time.

Jobs   For constantly developing businesses and organizations the Jobs system can be an invaluable solution. It allows employers to post job openings and allows job seekers to easily find available jobs. Job seekers can post their CV and decide what information will be public and what information confidential.

Site Manager   The Site Manager integrates all management tasks into one convenient area. From here all tool management interfaces are accessible,
